ACTIVITIES THIS QUARTER

Work this quarter focused on preparing for a meeting with the Agencies (USEPA, MDNR) on April 4, 2002. It is understood that the Agencies have completed their review of the RFI Data Gap Investigation Report and this will be a topic of discussion at the meeting.

PROBLEMS/POTENTIAL PROBLEMS/ACTIONS TO RECTIFY

No problems were encountered.

ACTIVITIES PLANNED FOR NEXT QUARTER

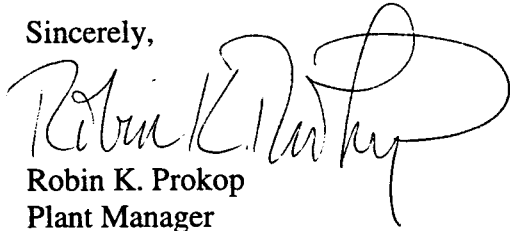

The following activities are planned for April through June 2002. This is based primarily on the outcome of the April 4th meeting.

- On April 4, 2002 a meeting is planned at the Queeny Plant between Solutia, URS, USEPA, MDNR, and Tetra Tech to discuss comments on the RFI Data Gap Investigation Report and the site-wide and expedited human health risk assessments. Also planned for discussion are the supplemental groundwater data for the former Bulk Chemical Storage Area.
- The expedited risk evaluations for the former Coal Storage Yard and the former Bulk Chemical Storage Area will be finalized. Upon approval of the revised reports, USEPA is expected to issue a letter effectively closing out the Notice of Violation (NOV).
- USEPA will formally issue comments on the RFI Data Gap Investigation Report. The comments will be addressed and the documents will be revised and submitted to the agencies.

- Solutia and URS will begin preparing a work plan for additional data collection (post-RFI) at the former Bulk Chemical Storage Area.
- Solutia and URS will begin reviewing the USEPA's Environmental Indicator (EI) forms. USEPA suggested a working session with Solutia to complete the forms.

Should you have any questions or require any additional information, please call Michael House, the Solutia Manager for this project. He can be reached at 314-674-6717.

Sincerely,
